22.Implement the Closing technique as a Morphological operation to dilate the foreground regions based on Open CV.

CODE:

```
import cv2
import numpy as np
img = cv2.imread(r"C:\Users\SUTHISH\Downloads\images.jpg")
if img is None:
    print("Image not found")
else:
    kernel = np.ones((5, 5), np.uint8)
    result = cv2.morphologyEx(
        img, cv2.MORPH_CLOSE, kernel
    )
    cv2.imshow("Original Image", img)
    cv2.imshow("Closing Image", result)
    cv2.waitKey(0)
    cv2.destroyAllWindows()
```

OUTPUT:
